

Parent Training Topics Tracking Form

Procedure:

This form helps you plan and document the training topics for families that are required by Performance Standards (!) and are of high interest to the parents at your site. **Parent training/education must be provided each month through events/activities, print (e.g. newsletters), or 1:1.**

Under each Focus Area are topics taken from *Family Connections* to help you design trainings, activities, and printed materials that are responsive to parent requests for information. Check the month that the topic was covered and include copies of materials in your *Family Engagement Notebook*, by month, in the “Parent Education” tab.

NOTE: It is up to your center/site and Parent Committee to decide what topic to cover for the month.
